

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) An adjustable bed mattress comprising:
a mattress having a substantially rectangular sleeping surface; and
a pivoting member attached to an exterior portion of a major surface of said mattress, and
configured as a tubular sleeve extending outwardly from the major surface, said pivoting member
adapted to receive an attachment bar for attachment to an adjustable bed frame, wherein the
mattress is configured to pivot about an axis parallel to the pivoting member.
- 2-5 (Canceled)
6. (Previously Presented) The adjustable bed mattress of claim 1, wherein said pivoting member
is disposed on a surface of said mattress opposite the sleeping surface and between two side
surfaces of said mattress.
- 7-8. (Canceled)
9. (Previously Presented) The adjustable bed mattress of claim 1, wherein said tubular sleeve
comprises a fabric grommet.
- 10-19. (Canceled)
20. (Withdrawn) The adjustable bed mattress of claim 1, wherein said mattress is a one-sided
mattress having a substantially rigid lower surface.
21. (Withdrawn) The adjustable bed mattress of claim 20, wherein said lower surface is divided
into at least two sections, which are positioned on opposite sides of said pivoting member.
- 22-51 (Canceled)

52. (Previously Presented) The adjustable bed mattress of claim 1, wherein the pivoting member is releasably attached to the mattress.
53. (Previously Presented) The adjustable bed mattress of claim 52, wherein the pivoting member is releasably attached to the mattress by a hook-and-loop fastener.
54. (Previously presented) The adjustable bed mattress of claim 1, wherein the mattress has a uniform thickness.
55. (Previously Presented) The adjustable bed mattress of claim 1, wherein the mattress comprises coil springs.
56. (Previously Presented) The adjustable bed mattress of claim 1, wherein the mattress comprises pocketed springs.
57. (Previously Presented) The adjustable bed mattress of claim 6, wherein the pivoting member comprises a plurality of tubular sleeves arranged between two side surfaces of the mattress.
58. (Previously Presented) The adjustable bed mattress of claim 1, wherein the mattress is a two-sided mattress having two major substantially rectangular surfaces, each adapted to form a sleeping surface; and
pivoting members configured as a tubular sleeve and attached to each of the major surfaces of said mattress, said pivoting members adapted to receive an attachment bar for attachment to an adjustable bed frame.
59. (Previously Presented) The adjustable bed mattress of claim 58, wherein said mattress is reversible.

60. (Withdrawn) The adjustable bed mattress of claim 1, comprising at least two pivoting members spaced in a longitudinal direction of the mattress, each of the at least two spaced pivoting members adapted to receive a corresponding attachment bar for attachment to the adjustable bed frame.
61. (Withdrawn) An adjustable bed mattress comprising:
a mattress having a substantially rectangular sleeping surface;
a removable slip cover covering the mattress; and
a pivoting member attached to said slip cover and adapted to be secured to an adjustable bed frame.
62. (Withdrawn) The bed mattress of claim 61, wherein the pivoting member is configured as a tubular sleeve.
63. (Withdrawn) The adjustable bed mattress of claim 61, wherein said pivoting member comprises a fabric grommet capable of receiving an attachment bar.
64. (Withdrawn) The adjustable bed mattress of claim 61, comprising at least two pivoting members spaced in a longitudinal direction of the slip cover, each of the at least two spaced pivoting members adapted to receive a corresponding attachment bar for attachment to the adjustable bed frame.
